# Dr. Steven Hodges, MD, FACEP Joins Retrieve Medical, Inc.

BASKING RIDGE, NJ, August 5, 2021 - - Retrieve Medical, Inc. is proud to announce Dr. Steven Hodges, MD, FACEP as a new member of the team. Dr. Hodges is an Emergency Medicine Specialist in Lake Forest, IL. and brings over 23 years of experience in the medical field. He is affiliated with medical facilities Northwestern Medicine, Lake Forest Hospital, Northwestern Memorial Hospital in Chicago and with Eisenhower Medical Center in Palm Springs, CA.

Dr. Hodges' deep experience with medical technology and innovation allowed him to serve on the technology leadership team for Northwestern Medicine where he helped lead the implementation of the EPIC electronic medical record system for the Northwestern system of hospitals and clinics.

This integration has improved outcomes for managed care by helping physicians take ownership and improve workflows within each medical service line. These efficiencies have allowed for significant cost savings, meaningful outcomes for patients, greater physician and patient satisfaction and improved reportable metrics.

"Teaming up with Dr. Hodges will prove to be a vital tool for Retrieve Medical as we complete our EPIC approval," states Mark Rosenberg, MD, Chairman of Retrieve Medical and who has spent 19-years as the Chair of Emergency Medicine at St Joseph's Health in Paterson and Wayne, New Jersey.

"I am excited to have the opportunity to work with Retrieve Medical. I believe their software solves a lot of the data acquisition and data relevance problems that the end user faces in all EHR systems today. I have had a chance to meet with the Retrieve team on a number of occasions, view their software in action and I am impressed with the speed and accuracy of data retrieval, says Dr. Hodges. "The intuitive Retrieve Medical software brings relevant and meaningful data to a patient encounter and integrates this seamlessly in a normal physician workflow process. Retrieve's vision of data management within the EHR is cutting edge and may well usher in a revolution of how we share and manage usable patient data real time."

*About Retrieve Medical, Inc.*
*Retrieve Medical, Inc. is healthcare software company delivering a Clinical Documentation Improvement (CDI) platform that provides proactive CDI support directly to the treating clinician during the patient examination. Retrieve Dx™ searches all available medical records: past exam notes, laboratory results, imaging studies, cardiac monitoring studies, and presents all relevant comorbidities to the Clinician in seconds.*
